What better way to entice the appetite than with the sight and smell of fresh hot tortillas. The tortillaXpress line of presses from doughXpress® has brought consistency and profitability to the process with the capability of producing as many as 400 six inch tortillas per hour. The unsurpassed quality and efficiency of doughXpress tortilla press has become a benchmark for how tortillas should be made and are being used in Mexican and Tex-Mex restaurants worldwide. Each press is specifically built with dual heated platens to evenly flatten the dough and partially bake it in seconds while maintaining consistency and quality.

DOUGHXPRESS QUALITY

The TXM-20 is an economic tortilla dough press perfect for low to medium production volumes. It is fast, safe, and simple to use. The clamshell design with the 16" x 20" platen surface provides maximum production with a minimal footprint.

TORTILLA WARMERS

Nothing entices the appetite better than the smell of fresh, hot tortillas. The TXW line of tortilla warmers work alone or coupled with a doughXpress® tortilla press for a complete tortilla package. After pressing the tortillas, finish them off on the TXW-1620, a 16"x20" warmer, the 20"x25" sized TXW-2025 or the large 40"x25" TXW-4025 model. Each warmer is designed to heat evenly and reach temperatures of 410°F giving those tortillas a fresh tortilla taste and smell.

FEATURES

- 1 temperature control dial
- 2 even heating platen
- 3 adjustable legs
- 4 safety rail

BENEFIT

- heating range from 200°F - 450°F
- provides consistent heating of product
- aids in leveling the warmer
- prevents accidentally touching the surface

THE NEW WAY TO PAILLARD DOUGHXPRESS MEAT PRESS

Good chefs know the importance of making good paillards. These flattened cuts of chicken, pork, veal or fish cook more evenly and have a larger center of plate coverage. Before the meatXpress line of meat presses from doughXpress®, hammering the cuts with a mallet or rolling pin was tedious, inconsistent and messy. Now with the Big Chick or Lil' Chick getting those delicious cuts perfect is as easy as pulling a handle down. Make hundreds of paillards per hour. The nonstick coated lower platens and swing out design make it easy to place and remove the cuts from the press.

CHOOSING THE RIGHT MIXER PLANETARY MIXERS vs SPIRAL MIXERS

It is very important to fully review your needs when choosing a mixer, as choosing the wrong style or size can slow down the operation of your business. Each mixer has its pros and cons depending on the needs of your application. Here is a list of the main features and benefits of Planetary Mixers vs Spiral Mixers.

PLANETARY MIXERS

- **All Purpose Mixer** used for whipping, mixing or beating a wide variety of products.
- **Multiple Speed Settings** to accommodate different ingredients – Eggs, Cake Batter, Potatoes, Dough, etc.
- **Size Options:** Available in tabletop and floor models.
- **Bowl Size** is measured by quarts. 7qt, 12qt, 20qt, 30qt, 40qt, 60qt, 80qt and 120qt.
- **Accessories:** These units generally come with an attachment hub to add on accessories like meat grinders and vegetable attachments
- **Limitations:** These mixers come with a capacity chart and if exceeding or constantly running at the capacity, they will have a much shorter life span.
- **Great for Restaurants, Bakeries, Cafes, Hotels and more.**

SPIRAL MIXERS

- **Dough Mixer**, great for all kinds of varieties of dough. Pizza, Bagel, Bread, etc.
- **Mixer Size** is generally by Flour or Dough weight.
- **2 Speed Setting**, which is great for developing your dough.
- **First Speed** helps bring the mix together into a consistent mass
- **Second Speed** develops the gluten structure of the dough.
- **Accessories:** These mixers come with a dough hook and attached bowl. Some models come with a removable bowl.
- **Limitations:** These mixers are only meant for dough and do not come with an accessory hub for attachments.
- **Great for Bakeries & Pizza Shops.**
